## **DETAILED ACTION**

### ***Information Disclosure Statement***

The information disclosure statement filed October 27, 2003 has been placed in the application file and the information referred to therein has been considered as to the merits.

### ***Status of Claims***

Claims 4 and 8-11 have been canceled.

Claims 1-3 and 5-7 are pending.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 3, and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. patent 5,365,586 granted to Indeck et al.

The Indeck reference discloses a method and apparatus for fingerprinting magnetic media. This fingerprint may be affixed to an object of manufacture in order to verify and authenticate the object, see Abstract.

Art Unit: 2137

With respect to claim 1, step a, the label with unreproducible pattern is disclosed as column 6, lines 23-28;

step b, processing the unreproducible pattern and including processed unreproducible pattern with the information relating to the article at column 4, lines 30-35 and Figure 3;

step c, encrypting a portion of the information at column 2, lines 35-45; and

step d, securely associating the article, the label and a tangible representation of the encrypted information at column 3, lines 5-10.

Claim 2, see column 4, lines 8-18.

Claim 3, see column 4, lines 24-40.

Claim 5, see column 3, lines 54-62 and column 4, lines 35-38.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. patent 5,365,586 granted to Indeck et al and further in view of U.S. patent 5,638,446 granted to Rubin.

The Indeck patent discloses verification using the publicly known key at column 4, lines 35-38. However, the instant claims provide for signing of the public key by a

Art Unit: 2137

trusted third party. The patent to Rubin teaches a secure distribution of electronic files. The files are signed by the source of the files (the authors) and the public key of the authors is signed with the secret key of a trusted third party, see Figure 2, blocks 30, 32, and 34. It would have been obvious to one of the ordinary skill in the art at the time of the invention was made to sign the public key of the source as taught in Rubin in order to provide a public key of a source with the certification of a trusted third party.
